

Environmental, Health & Safety Management Systems

An organization's Environmental, Health & Safety (EHS) performance can have a significant impact on its profitability and reputation. Successful companies proactively address EHS issues through well-defined procedures, processes, and management systems. Zephyr's team has experience helping companies develop and implement EHS management systems that achieve measurable results!

ZEPHYR CAN ASSIST YOU

Zephyr staff members have hands-on experience developing environmental and/or health & safety management systems that conform to the following standards:

- ISO 14001 Environmental Management System Standard
- OHSAS 18001 Health & Safety Management System Standard
- American Chemistry Council Responsible Care Management System
- OSHA Voluntary Protection Program
- Recycling Industry Operating Standard
- Texas Commission on Environmental Quality EMS Certification Program

IMPLEMENTATION ASSISTANCE

Zephyr has provided management system development and implementation support to numerous clients by:

- Conducting gap analyses
- Creating a management system implementation plan
- Identifying environmental aspects/impacts and/or safety hazards/risks
- Developing management system procedures
- Developing EHS programs required by applicable standards and regulations
- Identifying and recommending operational controls
- Setting environmental objectives/targets and programs to achieve continual improvement
- Providing certification assistance

TRAINING

Zephyr has developed and conducted environmental and/or health & safety training for clients at all levels of their organization:

- Overview for Executive Management
- Implementation for Managers and Supervisors
- Employee Awareness Training
- Internal Auditor Training
- Various EH&S training programs

Additionally, one of Zephyr's principals, Jeanne Yturri, co-authored a book entitled, ISO 14001 Implementation Manual published by McGraw-Hill, 1998. Contact Zephyr to obtain a free copy of Jeanne's book.

Assisting clients worldwide with their EHS consulting, training, and data systems needs.
