

Waste Management Assistance

Zephyr recognizes industrial and commercial entities must minimize pollution and cost while complying with a myriad of complex state and federal waste management regulations. Zephyr provides a broad spectrum of industrial and hazardous waste management services.

HAZARDOUS AND SOLID WASTE MANAGEMENT

Whether your facility is a Conditionally Exempt Small Quantity Generator (CESQG), Small Quantity Generator (SQG), Large Quantity Generator (LQG), or just an industrial non-hazardous waste generator, Zephyr can help you develop and maintain regulatory compliance:

- RCRA Personnel Training Plan development and RCRA training
- RCRA inspection preparation and assistance
- Contingency Plan development and training
- Waste analyses and waste classification
- Annual Waste Summaries and Biennial Reports
- Systems for tracking monthly waste generation
- Notice of Registration and STEERS

HAZARDOUS WASTE PERMITTING ASSISTANCE

Zephyr has prepared RCRA hazardous waste permit applications for a variety of industrial and commercial waste management facilities. Zephyr's strategic approach to the development of plans associated with the permit application has provided flexibility in facility operations and minimized the need for permit modifications. Zephyr's knowledge of the regulations and permitting process, as well as our experience with conducting public meetings, can help to make this regulatory process less of a burden upon our clients. Our permitting project experience includes:

- RCRA hazardous waste permits and renewal applications
- Class 1, 2, and 3 permit modifications
- Regulatory liaison support and negotiations during the permitting process
- Facility Siting Studies
- Geology / hydrogeology data development
- Groundwater monitoring system design and installation
- Compliance Plan applications

REGULATORY COMPLIANCE SUPPORT

Compliance with the various state and federal environmental regulations can be difficult; we specialize in answering the obscure questions. Zephyr has assisted clients with the following:

- Registered petroleum storage tanks
- Used oil regulations
- Dry cleaners regulations
- Universal waste regulations
- Exemptions from the regulations
- Environmental / due diligence audits
- Audits conducted under the Audit Privilege Act
- Expert witness support
- Source Reduction / Waste Minimization Plans and Annual Reports
- SARA Title III reporting assistance
- Tier I, Tier II, and Toxic Release Inventory (TRI / Form R) Reports
- Regulatory interpretations and liaison services
- Notice of Violation responses, Agreed Orders, and negotiations of alleged violations

Assisting clients worldwide with their EHS consulting, training, and data systems needs.
