

## Emergency Planning and Community Right-to-Know Act Compliance Support

The Emergency Planning Community Right-to-Know Act (EPCRA), also known as SARA Title III, places annual reporting requirements on a variety of facilities. These reports can sometimes be quite burdensome and facilities are often unaware of their need to comply with these requirements. Additionally, EPCRA, along with CERCLA (Comprehensive Environmental Response, Compensation and Liability Act), has provisions for emergency release reporting. Zephyr can help both with preparing and submitting these various reports, as well as the development of procedures and tools to ease future reporting.

### TOXIC RELEASE INVENTORY (FORM R)

Toxic Release Inventory (TRI), or Form Rs, can be onerous and time consuming. Zephyr's expertise with all environmental media allows our professionals to efficiently prepare TRI forms for clients in all industries. In addition, Zephyr can help identify pollution prevention opportunities based on current disposition of toxic materials.

### TIER II REPORTING

Tier II reporting applies to most industrial facilities. Zephyr has prepared hundreds of Tier II reports and can help facilities in any industry prepare these annual reports, which are used for emergency planning.

### RELEASE REPORTING

Both EPCRA and CERCLA contain various requirements for release reporting. Zephyr can assist facilities in not only understanding these requirements, but identifying areas with potential and/or frequent releases and developing ways to reduce the likelihood and impact of these releases.

### WHAT ZEPHYR CAN DO FOR YOU

- Preparing and submitting TRI Form Rs and Tier II reports
- Work with LEPC and local fire departments during site visits
- Create forms to track and collect data for future reporting needs
- Prepare site documentation to comply with recordkeeping requirements
- Develop site procedures for emergency reporting
- Train site environmental personnel on reporting requirements
- Work with facilities to develop strategies to reduce or minimize emissions and releases of toxic materials

*Assisting clients worldwide with their EHS consulting, training, and data systems needs.*
